

### Uninsulated Flexible Duct SM 150

This Class 1 Air Duct is constructed of a multiply laminated Aluminum & Metalized Polyester film with an-capsulated high tensile steel wire helix.

#### **Product Range:**

. 10 ddo 11 dd 190	
Diameters (inches)	4, 6, 8, 10, 12, 14, 16, 18, 20, 22
Standard Length (Feet)	25

#### Performance Data:

Temperature Range	-26°C to 120°C
Maximum Velocity	5000FPM

## **Recommended Operating Pressure:**

4"to 12" Diameter	
Static Pressure-positive	6" W.G.
Static Pressure-negative	0.8" W.G.
14" to 20" Diameter	
Static Pressure-positive	4" W.G.
Static Pressure-negative	0.8" W.G.

# Advantage of Uinsulated Flexible Duct SM 150

- · Supplied in standard 25 feet length.
- · Multi boxed Packing.
- · Low costs on transport and logistic.
- · Easy to Install
- · No special tool required for cutting or fixing
- · In case of a fire no toxic gases are emitted
- · The products have been tested on fire resistance

## Application of Uninsulated Flexible Duct SM 150

SM#150 is a range of fully flexible ducting, which has been specially designed for the HVAC Market. Because of its flexibility it is easy to install over round connector.
